

# Service Manual

Personal Cellular Telephone

## KG190

**Version: 1B**

### **WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product.

Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

Every care has been taken to ensure that contents of this service manual give an accurate representation of the equipment. However, DARTS TECHNOLOGIES CORP. accepts no responsibility for inaccuracies which may occur and reserves the right to make changes to the design without prior notice.

## **IMPORTANT**

**This document is intended for use by qualified service personnel only.**

### **Company Policy**

Our policy is of continuous development; details of all technical modifications will be included with service bulletins.

While every endeavor has been made to ensure the accuracy of this document, some errors may exist. If any errors are found by the reader, please notified it to company

## **Warnings and Cautions**

Please refer to the phone's user guide for instructions relating to operation, care and maintenance including important safety information. Note also the following:

### **Warnings:**

1. CARE MUST BE TAKEN ON INSTALLATION IN VEHICLES FITTED WITH ELECTRONIC ENGINE MANAGEMENT SYSTEMS AND ANTI-SKID BRAKING SYSTEMS. UNDER CERTAIN FAULT CONDITIONS, EMITTED RF ENERGY CAN AFFECT THEIR OPERATION. IF NECESSARY, CONSULT THE VEHICLE DEALER/MANUFACTURER TO DETERMINE THE IMMUNITY OF VEHICLE ELECTRONIC SYSTEMS TO RFENERGY.
2. THE HANDPORTABLE TELEPHONE MUST NOT BE OPERATED IN AREAS LIKELY TO CONTAIN POTENTIALLY EXPLOSIVE ATMOSPHERES EG PETROL STATIONS (SERVICE STATIONS), BLASTING AREAS ETC.
3. OPERATION OF ANY RADIO TRANSMITTING EQUIPMENT, INCLUDING CELLULAR TELEPHONES, MAY INTERFERE WITH THE FUNCTIONALITY OF INADEQUATELY PROTECTED MEDICAL DEVICES. CONSULT A PHYSICIAN OR THE MANUFACTURER OF THE MEDICAL DEVICE IF YOU HAVE ANY QUESTIONS. OTHER ELECTRONIC EQUIPMENT MAY ALSO BE SUBJECT TO INTERFERENCE.

### **Cautions:**

1. Servicing and alignment must be undertaken by qualified personnel only.
2. Ensure all work is carried out at an anti-static workstation and that an anti-static wrist strap is worn.
3. Ensure solder, wire, or foreign matter does not enter the telephone as damage may result.
4. Use only approved components as specified in the parts list.
5. Ensure all components, modules screws and insulators are correctly re-fitted after servicing and alignment. Ensure all cables and wires are repositioned correctly.

# **1. INTRODUCTION**

## **1.1. Purpose of the Manual**

This service manual contains the information and procedures required for installing, operating and servicing the LG GSM Personal Cellular Mobile Telephone system operating on GSM Digital Cellular Networks.

## **1.2. Structure of the manual**

The manual is structured to provide service engineering personnel with the following information and procedures:

1. General and technical information – provides a basic understanding of the equipment, kits and options, together with detailed information for each of the major component parts.
2. Installation and operating information – provides instructions for unpacking, installing and operating the equipment.
3. Servicing information – provides complete instructions for testing, disassembly, and reassembly of the product. Step-by-step troubleshooting information is given to enable the isolation and identification of a malfunction, and thus determine what corrective action should be taken. The test information enable verification of the integrity of the equipment after any remedial action has been carried out.
4. Illustrated parts list – provides to enable the identification of all cosmetic and some electrical components, for the ordering of replacement parts.

## **1.3. Servicing Responsibilities**

The procedures described in this manual must performed by qualified service engineering personnel, at an authorized service center.

The service engineering personnel are responsible for fault diagnosis and repair of all equipment described in this manual.

## 2. LEVEL 2 SERVICE GUIDELINES

### 2.1. Introduction

The document is intended to help you carry out repair up to Level 2 on the KG190 mobile phone.

The repair for International version and Asian variants are identical unless otherwise noted, therefore the description herein is confined to KG190 only.

*All repairs have to be carried out in an environment set up according to ESD regulations defined in international standards.*

### 2.2. Level of Repair Guidelines

The following description provides an outline of the level of repairs that could be determined at customers' premises. The level of repairs are highly dependent on the customer's resource and capabilities and are approved by

*Please abide by your service contract agreements in determining the level of repairs that you are capable of conducting.*

*Only qualified personnel shall perform all the related repair procedures based on the service contract*

#### 2.2.1. Level 0

This level **DO NOT** involved any kinds of repair or disassembly of the mobile unit. The customer **ONLY** needs to identify the fault occurred and send back the faulty units with the fault report to DARTS Mobile Service Center

The inventory swap units are available for order.

#### Level 0 Part No.

DARTS P/N	Description	SVC Level	LG P/N
2284-1870-6000	Swap Unit Complete, C2500	L0	

### 2.2.2. Level 1

This level requires the repair or disassembly of the mobile unit up to a certain specified criteria. This level might requires a specific tools in conducting the Level 1 repair job. All components attached to the upper and lower casings are replaceable. **DO NOT** remove any components on the PCB board.

If the repaired units still **DO NOT** function properly, customer needs to attach the fault report together with the units complete with housings and send back to DARTS Mobile Service Center for further investigations.

The components listed below are intended for Level 1 repair spares only.

#### Level 1 Part No.

DARTS P/N	Description	SVC Level	LG P/N
2207-0030-0003	Vibrator 3V	L1	
2285-2187-0000	BOTTOM CASE Ass'y Silver	L1	
221C-BA03-0102	Battery connector Pitch=2.5mm 3Pin PA08303	L1	
2285-3224-0000	Antenna Ass'y ( w Louder SPK)	L1	
2206-1110-0001	Receiver Panasonic - EASG1D501E2	L1	
2285-1187-A000	TOP CASE Ass'y LG Silver ( w LENS)	L1	
2211-DP18-1100	Deco. Plate for Side-L	L1	
2211-DP18-2100	Deco. Plate for Side-R	L1	
2211-SE18-0100	SIDEKEY 1 WAY	L1	
2211-SE18-1100	SIDEKEY 2 WAY	L1	
2218-1800-A100	Keypad RUS Silver	L1	
2212-DM18-0000	Metal dome	L1	
2206-5080-0002	MIC. FPT-22718-3	L1	
2211-BA18-0100	Battery Cover LG	L1	
2213-TR18-0100	RF_SW_CAP rubber Grey	L1	
2214-MF13-3Z80	Screw (M1.6*3.8) , ZN , White	L1	
2213-TR18-1100	PHONE JACK CAP	L1	
2213-TR18-2100	USB CAP	L1	
225n-TM03-3080	SENSOR VGA TM03-E1-X10	L1	

### 2.2.3. Level 2

This level of repair requires the exchange of the mobile unit main board. There will be non-removal of any components on the faulty main board. The exchanged faulty main boards shall be properly packed in a plastic bulk with the attached IMEI label and fault report and send back to DARTS Mobile Service Center for detailed repairs.

#### Level 2 Part No.

DARTS P/N	Description	SVC Level	LG P/N
2281-1831-0000	PCB Main Board, ARX	L2	

#### 2.2.4. Level 2.5

This level requires the repair or removal of certain specified discrete components of the mobile units' main board. This level of repair might requires a specific tools and soldering equipments with proper soldering jigs in conducting the repair job.

***ONLY THE QUALIFIED PERSONNEL SHALL BE LIABLE TO  
PERFORM THIS LEVEL OF REPAIRS UNDER THE SUPERVISION  
AND APPROVAL OF DARTS TECHNICAL TRAINER.***

#### Level 2.5 Part No.

***DO NOT INTEND TO REMOVE ANY ACTIVE COMPONENTS AS THIS WILL  
CAUSE THE MAIN BOARDS TO MALFUNCTION AND BEYOND THE  
REPAIR BOUNDARIES***

### 2.3. Level of Repair Service Tools and Interfaces

This section provides an overview of the necessary equipments and tools to conduct the specified levels of repair job accordingly.

Level of Repairs	Tools & Equipments	DARTS P/N	LG P/N
0	Not required		
1	ESD Strap, Tweezer, Power Drill, Air blower, Flux remover, Disassembly tool, Digital Multimeter		
2	ESD Strap		
2.5	As in Level 1 with additional equipment: Soldering and desoldering station, Flux paste, Solder wick, Solder lead, C2500 soldering jigs, CTS 55 GSM Tester, C2500 Testing jigs, Power supply		

The service interface is used for the purpose of communicating with the mobile unit in situation such as software upgrading and testing process. These service interfaces are listed below:

DARTS P/N	Description	SVC Level	LG P/N
	RF Cable	L2.5	
	SW D/L cable :	ALL	

### 2.4. Features

The LG Telephone Model KG190 is a high performance small, light handset for business and domestic use. The following features are provided:

1. Triple Codec which includes Half Rate / Full Rate and Enhanced Full Rate (EFR) speech codec.
2. Tri Band E-GSM900 and DCS1800/PCS1900 operation.
3. GPRS Service.
4. T9 Text Entry.
5. Voice Ringer.
6. Wireless Application Protocol (WAP) Browser.
7. Backup Battery.
8. Downloadable polyphonic melody ring tones.
9. Clock, Calculator and Currency Converter.

## 2.5. Mobile Unit Basic Kit

**Figure 2.5.1 Mobile Unit**

**Figure 2.5.2 Battery Pack**

**Figure 2.5.3 Earphone**

**Figure 2.5.4**

**Figure 2.5.5 AC Travel Charger**

**Figure 2.5.6 Software Download Cable**

<b>Item</b>	<b>Description</b>	<b>Part Number</b>
1	Cellphone	
2	Standard Battery (Li-Ion 720mAh)	220A-0307-1000
3	Earphone	
4	<b>USB cable</b>	
5	AC Travel Charger	2237-22T0-1003
6	<b>Software Download Cable</b>	

## 3. OPERATING INSTRUCTIONS

### 3.1. General

This section provides a brief guide to the operation and facilities available on the telephone handset. Refer to the Operating Instruction supplied with the telephone for full operational information.

### 3.2. Liquid Crystal Display

The telephone handset has a graphical chip on glass display. The following icons are available:

Figure 3.1: Crystal Display

1. Top of the screen shows Essential Indicators. (See table below)
2. Next line displays the operator name
3. shows date/time.
4. To enter **Menu** press left selection key.
5. To use **Name** in the phone book press right selection key.

## Essential indicators

	Indicates signal strength and alternate line service.
	Shows handset current battery charge strength.
	Indicates the phone keypad is locked.
	Indicates the profiles alert type is Ring
	Indicates the profiles alert type is vibration.
	Indicates the profiles alert type is vibration and ring.
	Indicates the profiles alert type is vibration then ring.
	Indicates the profiles alert type is light only.
	The Alarm clock is set on.
	Indicates “roaming”.
	Indicates missed call.
	Indicates Broadcast set on.
	
	
	Indicates new text messages.
	Indicates call diverted is set on
	Indicates GPRS service
	
	Indicates earphone plug in

### 3.1. Location of Controls

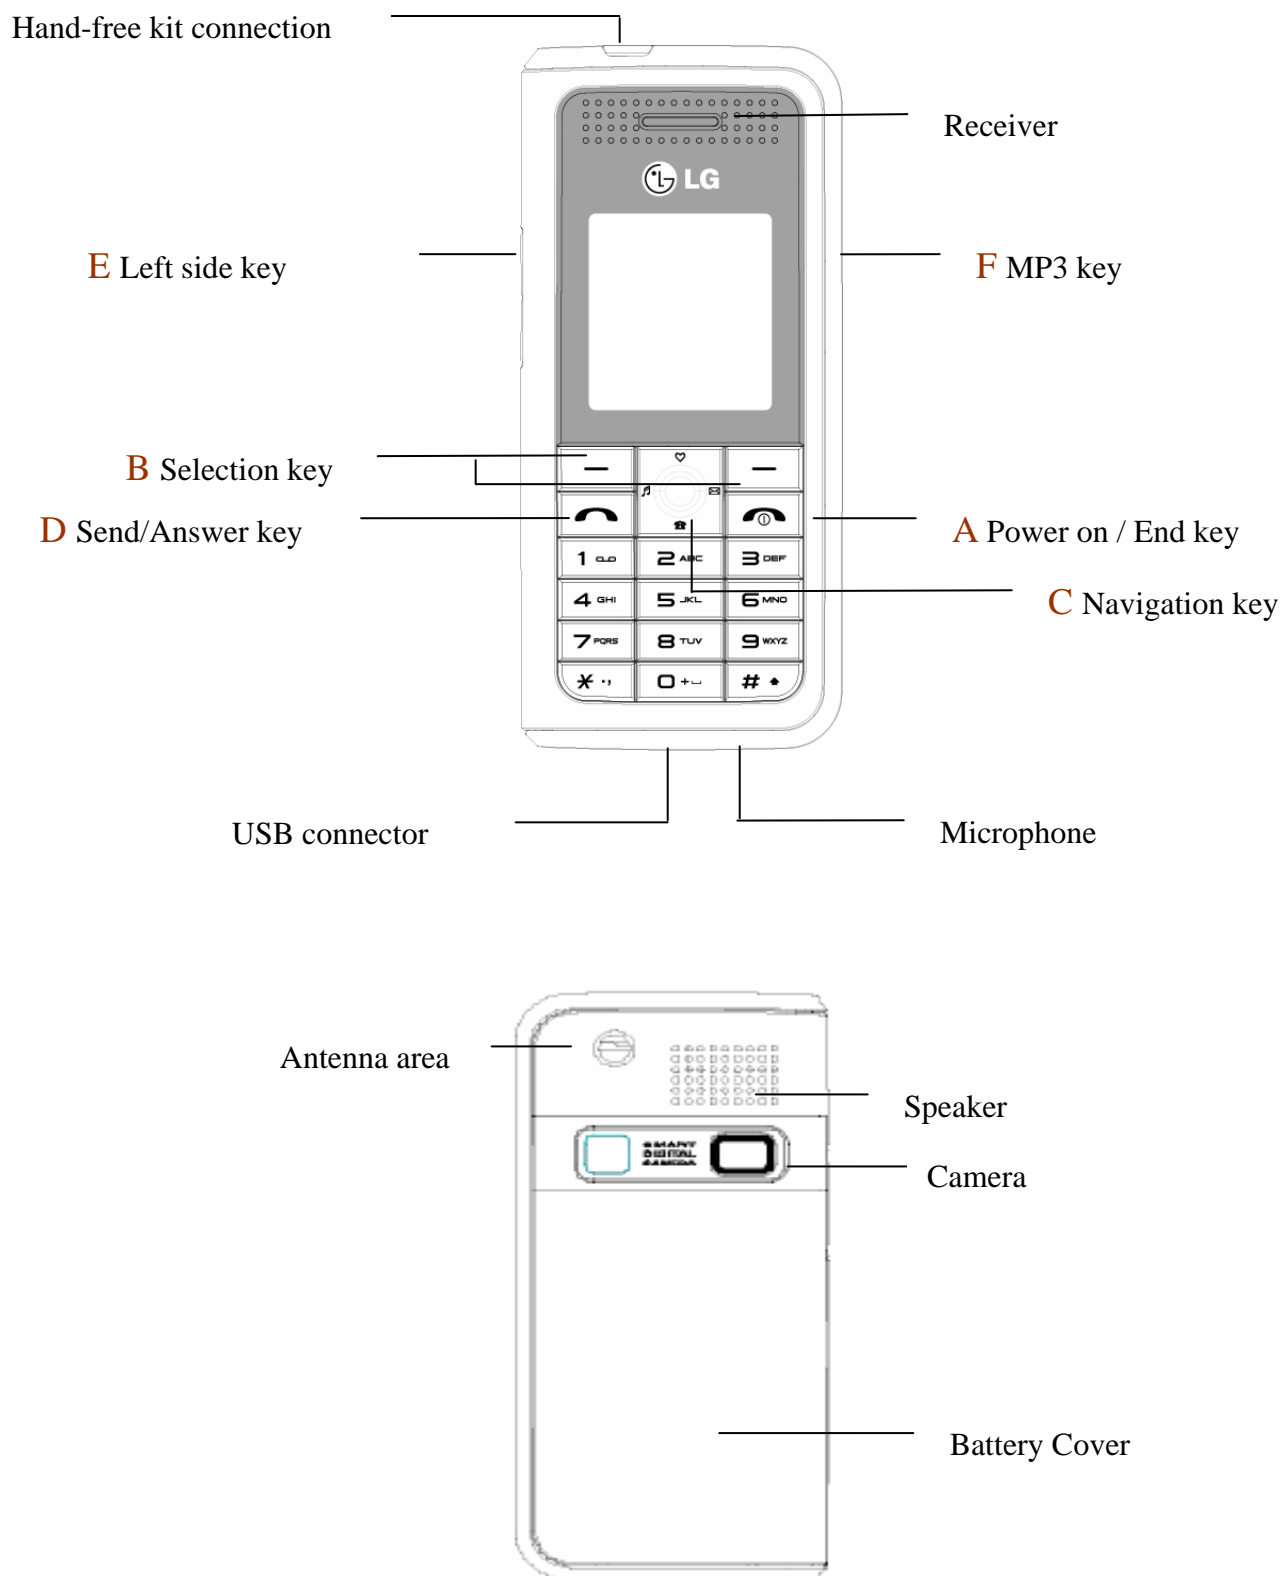

Figure 3.2: Location of Controls

## 3.2. Alpha Entry

### 3.4.1. Character Set / Key Assignments

There are 20 keys on KG190, including 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, \*, #, SEND, END, Left-Soft-Key (LSK), Right-Soft-Key (RSK), 4-way Navigation Key.

The following ID drawing is only used for Keypad Layout's reference.

Figure 3.3: KG190 Keypad Layout

## Key Function List

### A. Power/End key.

- Switch phone on and off. Also, ends a call or Exit from any function and back to Idle mode.

### B. Selection Key

- The function of the keys depends on the text shown on the display above the keys. For example, **Menu** and **Name** in Idle mode.

### C. Navigation Key

- Use for quick access to phone functions in Idle mode.
  - ◆ Up key: Access to the **Favorites** menu.
  - ◆ Down key: Access to the **Phone book** menu
  - ◆ Left key: Access to the **Profiles** menu
  - ◆ Right key: Access to the **Messages** menu
- Scroll through names and numbers stored in the phone book or through the phone's menus, submenus, and option list.

### D. Send/Answer Key

- Make and answer calls; press in Idle mode to see recent dialed calls.
- 0-9 input number and character

### E. Left Side Key

- Adjust handset volume

### F. MP3 Play Key/ Camera Play Key

- The shortcut to enter audio player in Idle mode.
- The shortcut to enter camera key by pressing deeply in idle mode.

### 3.5. Public Man Machine Interface (MMI)

#### 3.5.1. Reading the Phonebook Memory Location

# <MEMORY LOCATION> #

Leading zeros can be left out of the location number, e.g. 007 can be 7.

#### 3.5.2. Features for Factory Service

Features	Description
Factory mode	By 2945## to enter factory mode 1. Version                      2. Resource BIN 3. Echo loop                    4. Keypad 5. Vibrator                      6. Loud Spk 7. Set language to Russian	*#0007#[SEND]
Set language to English	*#0044#[SEND]

### 3.5.3.Tips for Call Option

A call can be connected to any single caller by pressing Option key. When user press Option key during active call, user can choose one of those functions from the list:

- Hold: put a call on.
- Retrieve: reconnect a holding call.
- Retrieve All: reconnect all holding call.
- Swap: switch between the call on hold and active.
- Conference: make a multi-party conversation.
- Transfer: transfer a call.
- Spilt: to suspend the multi-party call.
- End Single: end one of conference call.
- End All: end a multi-party call.
- End: End a call.
- Mute: mute the call during the conversation.
- New Call: make a new call during an active call.
- Phonebook: shortcut to phonebook menu.
- SMS: shortcut to Message menu.
- Sound Recorder: shortcut to Sound Recorder submenu.
- DTMF: set **On** / **Off** for DTMF (Dual Tone Multi-Frequency) tone dialing system.

### 3.6. Security Procedure

Features	Description
PIN 1 and 2	PIN activate, changing and deactivation
PIN control	Menu entry to change PIN2/phone code
Phone code	Manufacture defined codes to protect phone (4 - 8 digits). Changeable by user.
FDN	Fixed Dialled Number for limited Dialling
BDN	Barred Dialled Number for limited Dialling

### 3.7. Troubleshooting

The user is given the following information and advised to contact the dealer if the problems persist:

Problem	Cause	Remedy
Telephone will not switch on		Check that the battery pack is fully charged and correctly connected to the telephone.
Extremely short battery life for a new battery pack	The network in use and the condition of the battery pack can affect battery life.	Avoid areas of poor reception. Ensure batteries are fully charged.
Short battery life for an old battery pack	The battery pack was worn out.	Replace with a new one.
The battery level indicator  does not light when charging	If a battery is deeply discharged it will take a short time before there is sufficient owner in the telephone to light the battery level indicator  .	Leave to charge for several minutes in temperatures between +5°C and + 35°C.
Calls cannot be made	The telephone is locked.	Unlock the telephone (Menu: Setting: security setup: Phone Lock).
	Outgoing calls are barred.	Disable the outgoing call barring (Menu: Setting: security setup: Barred dials) (Menu: Setting: call setup: call barring)
	The telephone is not registered to a network.	Move to a coverage area and operate the telephone after it has registered with a network.
Calls cannot be made from Fixed Dial Stored		Check that SIM supports Fixed Dial Check if the Fixed Dial is switched on (Menu: Setting: security setup: Fixed dials). Check the telephone number is stored in the Fixed Dial.
Calls cannot be received	The telephone is not switched on.	Switch the telephone on.
	Incoming calls are barred.	Disable the incoming call barring (Menu: Setting: security setup: Barred dials) (Menu: Setting: call setup: call barring)
	The telephone is not registered to a network.	Move to a coverage area and operate the telephone after it has registered with a network.
Emergency calls cannot be made	User's phone is not in a GSM coverage area.	Check that the antenna symbol  is displayed. Move to coverage area and operate the telephone when the antenna symbol is displayed.
Telephone numbers Cannot be recalled	The telephone is locked.	Unlock the telephone (Menu: Setting: security setup: Phone lock).
	Fixed Dial is switched on	Switch off Fixed Dial (Menu: Setting: security setup: Fixed dials).

## 4. ASSEMBLY INSTRUCTIONS

### 4.1. Assembly Structure

## 4.2. Antenna Base sub assembly

1. To add cmos rubber on antenna base

2. To add speaker on antenna base

3. To add speaker cover on antenna base

4. To add antenna metal plate on Antenna base

### 4.3 PCBA sub assembly

1. To add RF shielding cover on PCBA

2. To add BB shielding cover on PCBA

3. To add LCM module on PCBA

4. To stick tape in LCM golden finger

5. To add metal dome on PCBA

6. To add CMOS on PCBA

7. To add antenna base on PCBA

8. To add LCM shielding on PCBA

#### 4.4 Top case sub assembly

1. To add receiver rubber and receiver on top case

2. To add Keypad on top case

3. To add mini-USB cap on bottom case

4. To stick lens on top case

## 4.5 Bottom case sub assembly

1. To add battery connector on bottom case

2. To add vibrator on bottom case

3. To add Mic on bottom case

4. To add earphone cap on bottom case.

5. To stick cmos lens on bottom case

#### 4.6 Main assembly

1. To add PCBA sub assembly on top case sub assembly.

2. To add right side key on main assembly.

3. To add left side key on main assembly.

4. To add bottom sub assembly on main assembly.

5. To add RF cap on Main assembly

6. To screw four screws

7. To add battery cover on main assembly.

## 5 TECHNICAL SPECIFICATION

### 5.1. TX Characteristics

All data is applicable to E-GSM900 and DCS1800 / PCS1900 except where stated.

#### 5.1.1. Frequency Error

± 0.1 ppm max. relative to base station frequency.

#### 5.1.2. Modulation Phase Error

RMS: Equal to or less than 5°

Peak: Equal to or less than 20°

#### 5.1.3. Output RF Spectrum due to Modulation

Offset from Centre Frequency (kHz)	Maximum Level Relative to Carrier (9dB)
±100	+ 0.5
±200	- 30
±250	- 33
±400	- 60
±600 to 1800	- 60

#### 5.1.4. Output RF Spectrum due to Switching Transients

Offset from Centre Frequency (kHz)	Maximum Level (dBm)		
	E-GSM 900	DCS 1800	PCS 1900
±400	- 19	- 22	- 22
±600	- 21	- 24	- 24
±1200	- 21	- 24	- 24
±1800	- 24	- 27	- 27

#### Measurement conditions for output RF spectrum measurements:

Frequency Spen	0 Hz
Measurement Bandwidth:	30 kHz
Video Bandwidth:	30 kHz (modulation)
100 kHz (switching)	
Average (Modulation)	Over 200 burst
Peak Hold (Switching)	Over 10 burst

#### 5.1.5. Spurious Emissions at Antenna Connector

Frequency range	Power level in dBm		
	GSM 400, GSM 700, GSM 850, GSM 900	DCS 1 800	PCS 1 900
9 kHz to 1 GHz	-36	-36	-36
1 GHz to 12,75 GHz	-30		-30
1 GHz to 1 710 MHz		-30	
1 710 MHz to 1 785 MHz		-36	
1 785 MHz to 12,75 GHz		-30	

Frequency range	Frequency offset	Filter bandwidth	Approx video bandwidth
100 kHz to 50 MHz	-	10 kHz	30 kHz
50 MHz to 500 MHz excl. relevant TX band: GSM 450: 450,4 MHz to 457,6 MHz; GSM 480: 478,8 MHz to 486 MHz, and the RX bands: For GSM 400 MS: 460,4 MHz to 467,6 MHz; 488,8 MHz to 496 MHz.	-	100 kHz	300 kHz
500 MHz to 12,75 GHz,  excl. relevant TX band: GSM 750: 777 MHz to 792 MHz GSM 850: 824 MHz to 849 MHz; P-GSM: 890 MHz to 915 MHz; E-GSM: 880 MHz to 915 MHz; DCS: 1 710 MHz to 1 785 MHz, PCS 1 900: 1 850 MHz to 1 910 MHz; and the RX bands: For GSM 400 MS, GSM 900 MS and DCS 1 800 MS:  925 MHz to 960 MHz; 1 805 MHz to 1 880 MHz. For GSM 700 MS, GSM 850 MS and PCS 1 900 MS:  747 MHz to 762 MHz; 869 MHz to 894 MHz; 1 930 MHz to 1 990 MHz	0 to 10 MHz ≥ 10 MHz ≥ 20 MHz ≥ 30 MHz  (offset from edge of relevant TX band)	100 kHz 300 kHz 1 MHz 3 MHz 3 MHz	300 kHz 1 MHz 3 MHz 3 MHz
relevant TX band:			
GSM 450: 450,4 MHz to 457,6 MHz	1,8 to 6,0 MHz	30 kHz	100 kHz

Frequency range	Frequency offset	Filter bandwidth	Approx video bandwidth
GSM 480: 478,8 MHz to 486 MHz GSM 750: 777 MHz to 792 MHz GSM 850: 824 MHz to 849 MHz P-GSM: 890 MHz to 915 MHz E-GSM: 880 MHz to 915 MHz DCS: 1 710 MHz to 1 785 MHz PCS 1 900: 1 850 MHz to 1 910 MHz	> 6,0 MHz       (offset from carrier)	100 kHz	300 kHz
NOTE 1: The excluded RX bands are tested in sub clause 13.4. NOTE 2: The filter and video bandwidths, and frequency offsets are only correct for measurements on an MS transmitting on a channel in the Mid ARFCN range. NOTE 3: Due to practical implementation, the video bandwidth is restricted to a maximum of 3 MHz.			

#### 5.1.6. Residual Peak Power

Equal to or less than 70 dBc (BW = 300 kHz)

## 5.2. Rx Characteristics

### 5.2.1. Sensitivity

#### *E-GSM 900 Full Rate Speech*

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT		Static Conditions	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
TCH/FS FER	6.742	8900					0.122	164000
Class Ib(RBER)	0.42	1000000	7.5	24000	9.333	60000	0.41	20000000
Class II(RBER)	8.33	120000					2.439	8200

The reference sensitivity level is < - 102dBm.

#### *E-GSM 900 Half Rate Speech*

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
TCH/HS FER	4.598	13050				
TCH/HS Class Ib(BFI=0)	0.404	148500				
TCH/HS Class II(BFI=0)	7.725	25500	8.500	20000	7.600	20000
TCH/HS(UFR)	6.250	9600				
TCH/HS class Ib((BFI or UFI)=0)	0.269	227000				

### ***DCS 1800 Full Rate Speech***

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT		Static Conditions	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
TCH/FS FER	6.742	8900					0.122	164000
Class Ib(RBER)	0.42	1000000	7.5	24000	9.333	60000	0.41	20000000
Class II(RBER)	8.33	120000					2.439	8200

The reference sensitivity level is < - 102dBm.

### ***DCS 1800 Half Rate Speech***

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
TCH/HS FER	4.598	13050				
TCH/HS Class Ib(BFI=0)	0.404	148500				
TCH/HS Class II(BFI=0)	7.725	25500	8.500	20000	7.600	20000
TCH/HS(UFR)	6.250	9600				
TCH/HS class Ib((BFI or UFI)=0)	0.269	227000				

### ***PCS 1900 Full Rate Speech***

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT		Static Conditions	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
TCH/FS FER	6.742	8900					0.122	164000
Class Ib(RBER)	0.42	1000000	7.5	24000	9.333	60000	0.41	20000000
Class II(RBER)	8.33	120000					2.439	8200

The reference sensitivity level is < - 102dBm.

### ***PCS 1900 Half Rate Speech***

The reference sensitivity performance in terms of frame erasure, bit error, or residual bit error rates (whichever is appropriate) is specified in the following table, according to the propagation conditions.

Channels	Propagation Conditions TUhigh		Propagation Conditions RA		Propagation Conditions HT	
	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples	Test Limit error rate %	Minimum No. of samples
